U.S.S.R. COMPUTATIONAL MATHEMATICS AND MATHEMATICAL PHYSICS

Cover-to-cover translation of
Zhurnal vychislitel'noi matematiki i matematicheskoi fiziki
Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

Scientific Translation Editor:
R. C. Glass, M.A., M.Sc.,
The City University, St. John Street, London, E.C.1.

Translators: J. Berry and D. E. Brown

Publishing and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Subscription Rates
1980 Subscription rate $440.00 *(including postage and insurance)*
Two year rate (1980/1981) $836.00
Subscriptions are only serviced after payment has been received and are not accepted for less than one year.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A.,*
and for the remainder of the world to:
*Pergamon Press Ltd., Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

LIST OF CONTENTS

Number 1

B. IMOMNAZAROV	1	A relaxation method for solving non-linear ill-posed problems
M.M. AGREST	8	Uniform asymptotic expansions of incomplete Lipschitz–Hankel integrals
R.A. POLYAK	14	Control sequence methods in constrained extremal problems
A.A. BELOLIPETSKII	32	Disturbed linear optimal control problems with phase constraints
V.P. BELUKHIN	46	A projection and division method for problems of linear dynamic programming
B.I. BUTRIM	58	n-Person games with an essential set of criteria
D.A. MOLODTSOV	69	Adaptive control in recurring games
O.N. BONDAREVA	80	Convergence of spaces with a relation and game-theoretic consequences
N.N. NEFËDOV	89	On a class of singularly disturbed equations
N.N. NIKITIN and V.D. RAZEVIG	102	Digital simulation of stochastic differential equations and error estimates
G.P. ASTRAKHANTSEV	114	Method of fictitious domains for a second-order elliptic equation with natural boundary conditions
Z.F. KHNKISHIEV	121	Convergence of the method of straight lines for solving degenerate elliptic equations
A.I. TOLSTYKH	134	Condensation of grid points in the process of solving and using high-accuracy schemes for the numerical investigation of viscous gas flows
I.G. BRYKINA	148	Integration of hypersonic viscous shock layer equations by a successive approximation method
V.A. MATSUK and V.A. RYKOV	160	Extension of the Chapman–Enskog method to mixtures of reacting gases
BACK HU'NG KHANG	176	On the completeness of a model of statistical recognition algorithms
S.A. YAKOVLEV	189	Recognition algorithms with a linear procedure for constructing the decision function
S.N. MIROSHNIK	203	The absolute recognition of objects in a class of algorithms

Short Communications

T.I. SAVËLOVA	209	The optimal regularization of convolution type equations with approximate right side and kernel
L.N. SHABLITSKAYA	215	On finding periodic solutions of differential equations
E.M. PODGAETSKII	219	Construction of approximations of the solution of a non-linear integral equation with estimation of the error in problems of heat and mass transfer
A.V. LOTOV	226	On the uniform approximation of reachable sets by means of discrete analogues
S.M. SHVARTIN	229	Investigation of stability in transport problems
K.A. ABUKOV and V.P. CHERENIN	235	Solution of the problem of siting regional information-computing centres by the method of successive calculations
A.M. SIROTKIN and I.S. SLESAREV	238	Calculation of the neutron distributions in complex heterogeneous nuclear reactor cells by the imbedded element method
V.M. KRIVTSOV	245	The properties of solutions of the system of equations of the moment method of calculating radiation transfer
Yu.L. LEVITAN, B.D. MOISEENKO, B.L. ROZHDESTVENSKII and V.K. SIDOROVA	247	The spectra of a plane Poiseuille flow and the problem of solving the Navier–Stokes equations for large Reynolds numbers
Yu.I. ROMASHKEVICH	254	Comparison of two methods of calculating two-dimensional non-stationary gas flows on a model problem
	260	Book Reviews

Vol. 18 1978

Number 2

T.I. SAVELOVA	1	Optimal regularization of equations of the convolution type with random noise in the kernel and right-hand side
M.L. AGRANOVSKII, R.D. BAGLAI and K.K. SMIRNOV	7	Identification of a class of non-linear operators
Ya.M. ZHILEIKIN and A.B. KUKARKIN	15	Optimal evaluation of integrals of rapidly oscillating functions
A.G. SUKHAREV	21	Optimal method of constructing best uniform approximations for functions of a certain class
N.F. ZALIZNYAK and A.A. LIGUN	31	Optimal strategies for seeking the global maximum of a function
A.I. SAMYLOVSKII and V.G. SUSHKOV	38	Construction of the characteristic function of a non-convex set and the related problem of quadratic integer-valued programming
FAM HIU SHAK	50	A support principle in a general extremum problem
B.M. MUKHAMEDIEV	60	The solution of bilinear programming problems and finding the equilibrium situations in bimatrix games
V.I. TSURKOV	66	A two-stage stochastic programming problem of the block type
K. BALLA	75	The error of replacing the exact condition by an approximate condition for boundedness of the solution of a system of ordinary linear differential equations with a regular singularity
Yu.L. GAPONENKO	83	A regularizer in continuous function space
Yu.I. ZAGORODNIKOV and P.E. SOBOLEVSKII	88	The method of fractional powers of operators in the study of the two-dimensional difference system of the Navier–Stokes equations
S.M. DIKMAN and N.B. KONYUKHOVA	96	Numerical investigation of the skin effect in a plasma column
V.P. GORELOV and V.I. IL'IN	105	The approximate description of moderation in hydrogenless moderators
O.M. BELOTSERKOVSKII, V.V. DEMCHENKO, V.I. KOSAREV and A.S. KHOLODOV	117	Numerical simulation of some problems of the laser compression of shells
N.A. MELLER	138	Viscous flow past an elliptic cylinder
V.Ya. KARPOV, D.A. KORYAGIN and A.A. SAMARSKII	149	Principles of the development of applied program packages for problems of mathematical physics
BACH HU'NG KHANG	156	The pattern recognition algorithm model of the potential function type
		Short Communications
A.A. ANDREEV	165	The problem of the optimal number of non-asymptotic coefficients in the double reduction method
I.B. VAPNYARSKII	169	Numerical methods of solving problems of the mathematical theory of standardization
P.N. ZAIKIN and V.N. MOISEEV	172	A stable method of interpreting the data of isotope analysis
V.A. DRONOVA and Yu.A. ERUKHIMOVICH	176	Interpolation formulas for some frequently used special functions
K.G. VALEEV	179	Numerical construction of Lyapunov functions for difference equations
A.A. CHARAKHCH'YAN	184	A numberical scheme for time-dependent problems with non-stationary radiation transfer
M.A. GALAKHOV, K.I. ZAPPAROV and A.G. PATRAKOV	189	Numerical solution of the singular integrodifferential equation of contact hydrodynamics
V.M. BORISOV and A.S. LITVINOVICH	192	A scheme for computing steady viscous gas flows
E.G. SHIFRIN	194	The global uniqueness of the solution of the direct problem for the Laval nozzle
E.V. ZAKHAROV and N.I. NESMEYANOVA	197	A method of solving axisymmetric problems of the diffraction of electromagnetic fields
N.N. KATERINOCHKINA	201	The search for the maximum upper zero of some subclasses of monotonic Boolean functions
	205	Book Review

Vol
18
197

Number 3

Kh.D. IKRAMOV	1	Conditionality of the intermediate matrices of the Gauss, Jordan and optimal elimination methods
N.D. SERGEEV	17	Correction of the results of factorization when modifying a non-degenerate square matrix
V.A. KARATYGIN, V.A. ROZOV and N.O. SOKOLOVA	24	A case of asymptotic summation in a two-dimensional domain
A.G. KOROTCHENKO	34	An algorithm for seeking the maximum value of univariate functions
E. PFEIFER	45	Discrete convergence of the approximations obtained by the multi-step method for the solutions of non-linear second-order boundary value problems
T.I. SAVELOVA	53	Regularization using Fejer operators
M.I. KHAIKIN	60	The system of Wiener–Hopf integral equations in a singular case as an ill-posed problem
D.A. MOLODTSOV	68	Regularization of a set of Pareto points
E.R. AVAKOV	75	Approximation conditions for max-min problems with connected sets
Dzh.A. BABAEV and K.Sh. MAMEDOV	86	Aggregation of a class of systems of integer-valued equations
V.P. IL'IN	92	On spline solutions of ordinary differential equations
R.M. KERGE	99	Estimation of the error of the method of subdomains
A.V. LUKSHIN	105	Asymptotic behaviour of the solutions of a Fredholm equation of the second kind with a small parameter
V. VAINEL'T	113	Difference schemes for solving boundary value problems for differential inequalities
S.I. SERDYUKOVA	125	Asymptotic stability of a finite-difference boundary value problem
S.A. GABOV	132	Green's function of the Laplace operator in a two-dimensional problem with directional derivative with constant coefficients
V.V. KRAVTSOV	144	Approximation of a function of several variables by an antenna potential
L.I. KOMAROV, E.V. KRYLOV and I.D. FERANCHUK	153	Numerical solution of a non-linear self-consistent eigenvalue problem
V.P. GORELOV and V.I. IL'IN	164	A method of solving critical problems
P.N. BESARAB	170	Numerical methods of constructing the orientation parameters of a rigid body
A.M. BISHAEV and V.A. RYKOV	182	Recondensation of a monatomic gas at low Knudsen numbers
I. GVORETSKII	192	A new language for structured programming
A.V. KABULOV and G.F. LOSEV	201	Local algorithms simplifying the disjunctive normal forms of Boolean functions
Ya.A. UZAKOV	208	Methods of choosing the first approximation for optimization in a class of voting algorithms
R.A. LUTFULLAEV	215	Generalization of the class of algorithms for the calculation of estimates

Short Communications

Yu.P. SHVARTSMAN	226	An iterative algorithm for solving systems of linear equations with a rectangular matrix
S.M. ERMAKOV and A.A. ZHIGLYAVSKII	230	Generalization of the "maximum cross section method" for the simulation of distributions
A.I. GREBENNIKOV	236	The optimal approximation of non-linear operators
Yu.L. GAPONENKO	242	The method of consistent approximation for solving non-linear operator equations
I.S. GRANIK	246	The localization of temperature perturbations in media with volume absorption of heat
V.A. EREMENKO	252	Numerical study of the behaviour of a discontinuous signal close to a caustic

Vol. 18 1978

M.Ya. IVANOV and A.N. KRAIKO	259	The approximation of discontinuous solutions by using through calculation difference schemes
G.N. KURAEV	263	The problem of stationary free convection with non-linear boundary conditions
V.G. GRUDNITSKII, Yu.A. PROKHORCHUK and S.P. RYBAK	270	Calculation of the irregular stage of the diffraction of a shock wave by a blunt body
V.I. ISHCHUK	277	Minimization of the generalized error functional in recognition algorithms
A.G. GORELIK	281	Geometrical interpretations of indexed three-valued calculi
	288	Book Reviews

Number 4

V.D. CHUBAN'	1	An iterative scheme for solving the systems of linear algebraic equations of the method of finite elements
N.N. POVORAZNIKOV	11	A general method for solving transcendental equations
L.N. DOBRODEEV	27	Cubature rules with equal coefficients for integrating functions with respect to symmetric domains
A.I. GREBENNIKOV	34	An explicit method for approximating functions of one or several variables by splines
L.V. PETRAK	40	A method of solving the problem of best rational approximation
V.N. VORONKOV	50	Fast inversion of a Laplace transform
A.P. BULANYI and Yu.M. DANILIN	57	Quasi–Newton minimization algorithms, based on the construction of systems of conjugate vectors
V.P. TARASOVA	66	Optimal strategies for seeking the domain of greatest values for a class of functions
A.V. BARKALOV and R.G. TRONGIN	77	Dynamic consideration of compromise solutions in a many-sided conflict
V.V. PODINOVSKII	88	Construction of the set of effective strategies in a multi-criterion problem with importance-ordered criteria
E.N. OREL	95	Approximation of Bellman's function by piecewise constant functions
V.I. ELKIN	107	On the conditions of aggregation of controlled dynamic systems
V.N. ORLOV	114	The piecewise-polynomial approximation in W^1_2 of functions from W^2_p, $1 < p \leqslant 2$
L.V. MASLOVSKAYA	122	On the convergence of variational-difference methods for a non-linear boundary value problem of the theory of elastic plates
V.G. LITVINOV	129	Methods encountered and estimates of the error of the approximate solution in the problem of the bending of plates of variable thickness
I.L. OSIPOV, V.P. PASHCHENKO and A.V. SHIPILIN	143	Computation of inviscid gas flows in ducts with sharply varying geometry
L.I. SEVERINOV	153	A method of solving non-linear difference boundary value problems of the mechanics of a continuous medium
V.I. KRAVCHENKO	165	Gradual acceleration and braking of a circular cylinder in the flow of a viscous incompressible fluid
M.Ya. IVANOV and F.L. IDIYATULLINA	174	A method of third-order accuracy for calculating the steady smooth flows of an ideal gas
R.S. SHAGINYAN	185	Methods of recognition by systems of test-like base sets

Short Communications

A.V. FEDOSEEV	191	An optimal control problem for the development of a group of mineral deposits
B.A. GALANOV	198	Application of the regularization method in the solution of boundary value problems by the method of Green's functions

F.F. IVANAUSKAS	205	The solution of the Cauchy problem for a system of integro-differential equations
Yu.V. POPOV and A.M. POPOVA	211	The analytic solution of an integral equation of the Fredholm type
I.M. SOBOL'	217	The Monte Carlo simulation of Compton scattering by relativistic electrons
N.S. GRIGOR'EVA	222	The short-wave asymptotic form of Green's function for a section
V.A. MATSUK	228	The Chapman–Enskog method for a chemically reacting gas mixture with internal degrees of freedom
Yu.A. POVESHCHENKO and Yu.P. POPOV	234	Some gasdynamic problems with sources
V.N. KUBLANOVSKAYA	243	Solution of the spectral problem for a singular bundle of matrices
F.P. VASIL'EV	248	On the tangent method
	250	Book Reviews

Number 5

V.D. CHUBAN'	1	An effective direct method for solving systems of linear algebraic equations of the finite element method
V.K. GORBUNOV	8	Reduction of optimal control problems to finite-dimensional problems
A.V. ALBUL, B.N. SOKOLOV and F.L. CHERNOUS'KO	21	A method of calculating the control in antagonistic situations
D.V. DENISOV	28	A method of random search in constrained minimization problems
V.F. DEM'YANOV	37	A multi-step method of generalized gradient descent
I.V. KURDYUMOV, M.V. MOSOLOVA and V.E. AZAINSKII	45	Computational algorithm for problems of quadratic programming of high dimensionality
N.N. ASTAF'EV	55	Dual regularization of a linear programming problem, specified by a sequence of realizations
P.I. MONASTYRNYI	65	Convergence of an interval shooting method
K.V. EMIL'YANOV	72	A difference scheme for an ordinary differential equation with a small parameter
V.S. SERGEEV	80	A method of obtaining estimates of domains of attraction by means of Lyapunov functions, constructed by a numerical method
E.I. GOLANT	88	Conjugate families of difference schemes for equations of parabolic type with lowest terms
I.V. FRYAZINOV	95	Difference schemes for Laplace's equation in stepped domains
Yu.I. MOKIN	111	Some methods of describing an approximately stationary flow of electrons in a vacuum diode
V.N. KOSHPARENOK and V.P. SHESTOPALOV	121	A rigorous solution of the problem of the excitation of two circular cylinders with longitudinal slots
V.V. ALEKSANDROV, V.N. KOTEROV and A.M. SOROKA	138	Asymptotic analysis of the structure of a semi-self-maintained volume gas discharge
V.A. MATSUK and V.A. RYKOV	154	The Chapman–Enskog method for a multivelocity multitemperature reacting gas mixture
V.M. BORISOV and I.E. MIKHAILOV	166	The method of characteristics for calculating three-dimensional supersonic irrotational flows
A.I. RUBAN	175	Numerical solution of the local asymptotic problem of the unsteady separation of a laminar boundary layer in a supersonic flow
Yu.P. GOLOVACHEV	188	Calculation by the Navier–Stokes equations of the flow of non-equilibrium gas mixtures past blunt bodies
V.A. PUKHLII	196	A method for the analytic solution of two-dimensional boundary value problems for systems of elliptic equations
G.D. CMEKHOV and V.A. FOTIEV	204	Calculation of the equilibrium composition of a high-temperature gas
L.N. BOCHAROV	211	A mathematical model of the short-term prediction of the situation of a fishery

Vol. 18 1978

Short Communications

E.L. PAPERNOV	219	The solution of infinite systems of linear algebraic equations
V.V. DITKIN	223	Approximate calculation of the eigenvalues of a polynomial bundle of linear operators
V.V. POSPELOV	228	The error of approximation of a function of two variables by the sums of products of functions of one variable
V.N. MALOZEMOV and A.V. SOLOMENNIKOV	231	The rate of convergence of a method of equalizing maxima
V.A. DMITROVSKII and E.I. OSTROVSKII	236	Estimate of the error of the method of dependent trials
A.I. PAVLOV, B.V. POKHODZEI and I.A. RAVKIN	240	A method of simulating and exponential distribution based on the properties of the Poisson process
S.S. VINOGRADOV	244	A soft spherical "cap" in the field of a plane sound wave
A.A. GLADKOV	249	Solution of the problem of the diffraction of an acoustic pulse by a wedge using wave potentials
K.B. PAVLOV, L.D. POKROVSKII and S.N. TARANENKO	255	The steady flow of an inviscid heat-conducting gas
A.G. SLEPTSOV	262	Estimates of the eigenvalues of the stability equations of a compressible boundary layer
V.P. KOLGAN	267	The use of smoothing operators in difference schemes of a high order of accuracy
V.A. EVSTIGNEEV	274	A local algorithm for finding the bicomponents in a flow graph
	280	Book Reviews

Number 6

A.S. LEONOV	1	Justification of the choice of regularization parameter according to quasi-optimality and quotient criteria
V.V. DITKIN	16	An iterative method for solving the eigenvalue problem for a bundle of linear operators
A.A. LYUBUSHIN	24	Convergence rate estimate for difference-quadrature approximations of variational problems
L.G. GURIN	36	A principle for decision-making in the presence of random and indeterminate factors
D.V. DENISOV	44	The method of iterative regularization in constrained minimization problems
V.V. BARANOV	55	A dynamic programming algorithm in stochastic systems
I.I. EREMIN	69	Standard iterative processes of nonsmooth optimization for non-stationary problems of convex programming. I
Dzh.A. BABAEV, K.Sh. MAMEDOV and M.G. MEKHTIEV	82	Methods of constructing suboptimal solutions of the multi-dimensional rucksack problem
A.A. ZLOTNIK	92	Convergence rate estimate in L_2 of projection–difference schemes for parabolic equations
G.I. SHISHKIN	105	Difference scheme for solving an elliptic equation with small parameter in a domain with curvilinear boundary
A.S. KHOLODOV	116	Construction of difference schemes with positive approximation for hyperbolic equations
P.A. ANDROSENKO and B.A. EFIMENKO	133	Modification of the Monte Carlo method for calculating the local characteristics of a radiation flux
V.A. KORSHUNOV and V.P. TANANA	140	Determination of the energy spectrum of a Bose system by thermodynamic functions
S.A. GABOV	157	Applications of the angular potential integral equations for the plane problem with an oblique derivative for harmonic functions

Vol. 18 197

N.A. TIKHONOV	170	Determination of the characteristics of evaporation
A.M. ANTONOV and Yu.A. BELOV	180	The asymptotic of the solutions of a class of non-linear boundary value problems with a free boundary
Zh.N. KUDRYASHEVA	190	A numerical method of solving the problem of the spread of a conservative admixture in a water course
A.Yu. ERËMIN and N.Ya. MAR'YASHKIN	202	The package processing of systems of linear algebraic equations with sparse matrices
Yu.A. ZUEV	212	Approximation of a partial Boolean function by a monotonic Boolean function
I.I. DZEGËLENOK and M.A. MEDETOV	219	Determination of the levels of complexity of a linear classifier

Short Communications

G.V. SAVINOV	230	Numerical stability of a block triangular expansion for a class of linear systems
B.P. PUGACHEV	235	Notes on the use of the method of least squares for solving systems of equations
N.M. ANDRUSHEVSKII, N.P. ZHIDKOV' and B.M. SHCHEDRIN	238	The optimal approximations of functions by a finite number of their Fourier coefficients
M.G. VASIL'EV and V.S. YUFEREV	243	Bicubic spline-interpolation in polar coordinates
V.G. VASIL'EV	247	On a necessary condition for the existence of a specila solution of an integral equation of the first kind satisfying a specified constraint
A.A. KURAEV	249	Analytic determination of the target function gradient for an implicit form of the equations of state of a dynanic system
G.A. ATANOV	253	Generalization of S.K. Godunov's method to the calculation of flows with cleavage
